

A red DB Cargo locomotive is positioned in a large industrial workshop. A man in an orange safety vest leans out of the driver's window. The workshop has a high ceiling with various pipes and hanging lights. The floor is polished and reflects the overhead lights. The overall scene is well-lit and professional.

Workshop in Fredericia**

We deliver the goods

Experience the new DB Cargo Workshop in Fredericia

We deliver excellent rolling stock maintenance – the foundation for reliable assets, efficient operations, and satisfied customers.

Expertise for rolling stock

Light maintenance and project jobs for locomotives and freight wagons

Exciting jobs in Fredericia

Teamwork and skill development are fundamental to our culture

New technology

The future is today – we are working with high technological competence

Sustainability ahead

Delivering and developing climate-friendly solutions

Group-wide strength

Trainings, development, and know-how shared within Deutsche Bahn Group

Reliably delivering customer's goods

Reliability for our locomotives means we can deliver goods to our customers. And by that, we are saving not only 80% of the CO₂ emissions compared to trucks – we're keeping supermarkets filled, factories running, and ports busy.

Our services in Fredericia include operational light maintenance, repairs, inspections, and mobile maintenance for a large number of locomotive series and almost all types of freight wagons.

Special projects

- Works on the European Train Control System
- Conversions and retrofitting
- External cleaning

Sammen skaber vi en grøn fremtid!

This is DB Cargo Scandinavia

At DB Cargo Scandinavia, we believe that sustainability is more than a choice; it is a commitment. Our commitment to a greener future pervades every aspect of our operations. Our goal is to actively contribute to a more sustainable world, from eco-friendly rail transportation to innovative digital solutions that change the world of rail.

Significantly reduced CO₂ emissions

Freight transport by rail saves more than 80% of CO₂ emissions compared to road transport, making it the most climate friendly mode of transport.

Collaboration and investments

We are investing in driver training, modernizing our fleet, and collaborating with the industry to make transportation more environmentally friendly. The

railway industry has three clear advantages that promote green transport: minimal rolling resistance, use of electric locomotives with green power, and energy production during braking.

Contributes to Denmark's climate goals

Denmark has a goal of reducing CO₂ emissions with 70% in 2030 compared to 1990 and to become climate neutral by 2050. Our green transportation actively contributes to reaching these ambitious and necessary goals. Because: Freight belongs on rail.

The green facts

- A single train replaces up to 52 trucks. At DB Cargo Scandinavia, we replace up to half a million truck journeys per year.
- Trains emit on average 18 g CO₂ per tonne-km, whilst a 40-ton truck emits 96 g CO₂ per tonne-km. With our EcoSolutions and depending on available traction current, the environmental advantage of rail increases further.
- DB Cargo Scandinavia saves 240,000 tons of CO₂ per year. This is equal to the CO₂ emissions attributed to the per-capita emissions of a typical medium-sized Danish municipality.

We're contributing to the UN Global Goals

Vi leverer IT freelance konsulenter, det har vi gjort i 20 år

Vi er leverandør til DB Cargo – vi vil også gerne levere til jer

Driftskonsulenter, systemadministratorer, dev-ops og IT-supportere til platforme som Windows, Linux, Azure, AWS, z/390

Udviklere, testere, arkitekter, projektledere til teknologier som .NET, Java, Power Apps, SharePoint, Cobol, PHP

2B Networks

Do you have challenges in your operations and feel you could improve? Ab Ovo has for 25+ years supported rail and transportation companies to gain competitive advantages by digitizing and improving their business operations. Contact us if you are interested in gaining the value you deserve!

Our solutions cover for example:

- ✓ Order-to-cash (Enterprise Resource Planning)
- ✓ Supply chain planning and optimization
- ✓ Resource / asset planning and management
- ✓ Rail freight operations and planning
- ✓ Service & network planning
- ✓ Maintenance planning
- ✓ Optimized transport and execution
- ✓ Yard/ port/ terminal planning and operations
- ✓ Mobile applications e.g., for field workers
- ✓ Advanced analytics

But we can do
so much more.
Let us know
your challenges.
