Denmark's strong connection
to Europe's rail network**

DB Cargo Scandinavia: Your direct partner for the European markets

DB Cargo Scandinavia is Denmark's largest rail freight operator, with a subsidiary in Sweden and part of DB Cargo's extensive European network.

For our customers, this means direct and reliable access to Europe's key freight corridors.

Shifting freight from road to rail significantly reduces CO₂e emissions, improves delivery reliability, and removes trucks from the roads.

We deliver:

- Direct access to Europe's largest rail freight network
- Scalable intermodal solutions
- Reliable operations
- Verifiable CO₂e reductions

Taulov Intermodal Terminal: Jutland's hub for intermodal transport

Taulov Intermodal Terminal is a key link between the Nordic region and continental Europe.

Rail, road, and port come together in one integrated setup designed for high volumes and complex logistics.

This provides our customers with:

- Stable capacity for national and international transport
- Seamless rail-road integration
- Handling of complex freight flows, including dangerous goods and waste

Taulov Intermodal Terminal is built for volume. Built for reliability. Built for the future of freight transport.

Facts

- Handling of trains up to 700 meters
- Storage sidings
- Opening hours: Monday–Friday 06:00–20:00
- Handling of containers, trailers, and swap bodies
- Certified for handling dangerous goods
- Handling of all types of freight – including waste
- Depot and storage facilities

Taulov Intermodal Terminal is a key logistics hub and an important part of Denmark's green transport infrastructure.

Høje Taastrup Intermodal Terminal: Flexibility close to the capital

Høje Taastrup Intermodal Terminal connects the Greater Copenhagen area directly to the European rail network. The short distance to customers and distribution hubs in Eastern Denmark makes it ideal for fast and flexible multimodal transport.

This provides our customers with:

- Efficient rail-road operations
- Reliable handling of national and international transport
- Flexible solutions for different types of freight

Høje Taastrup Intermodal Terminal ensures a short distance from rail to final delivery. Reliable operations. Seamless multimodal integration.

Facts

- Handling of trains up to 600 meters
- Storage sidings
- Opening hours: Monday–Friday 06:00–20:00
- Handling of containers, trailers, and swap bodies
- Waste hub

Europe's green and strong rail network

DB Cargo Scandinavia can provide direct access to an extensive European network of terminals, transport corridors, and strategically located logistics hubs. From Scandinavia to key destinations across Europe, we connect businesses with efficient and reliable rail freight solutions every day.

Rail is one of the most climate-friendly modes of transport available. Compared to road transport, rail freight can reduce CO₂e emissions by up to 80%, while a single freight train can remove up to 52 trucks from the roads. This not only lowers

environmental impact, but also helps reduce congestion and supports a more sustainable transport infrastructure across Europe.

A future-proof transport solution

With DB Cargo Scandinavia, you gain more than local rail access – you connect to a strong European logistics network built for the future. We combine operational reliability, international reach, and sustainable transport solutions to help businesses move goods smarter, greener, and more efficiently across borders.

Strong rail connections – today and tomorrow
