

## **Business Controller**

Are you ready to make a significant business impact for an international company with full steam ahead? And would you like to collaborate closely with managers across departments and influence how we manage controlling in the future?

As business controller at DB Cargo Scandinavia, you will be part of the historic significance and charm of the railway industry while you help lay down the tracks for our modern growth journey across Scandinavia.

### **Welcome aboard DB Cargo Scandinavia**

DB Cargo Scandinavia A/S is the Scandinavian subsidiary of the Deutsche Bahn Group which is Europe's number one railway freight company. After 10 years in a joint venture, we are now 100% owned by our German parent company.

This transition means that we now have even more strategic freedom to seize new business opportunities across Scandinavia. Furthermore, the finance function now has the opportunity to redefine how we deliver world-class financial business partnering across our Danish and Swedish activities.

Our Danish company employs 280 people, primarily loco drivers and shunters. At our HQ in Høje Taastrup, you will join 50 colleagues and become part of our Finance team of 9 along with 2 other business controllers like yourself.

### **Build the future of our controlling function and make business impact**

You will work with a wide variety of controlling tasks, both regular reporting and budgeting as well as ad hoc analyses that shed light on specific business needs. You can look forward to getting a thorough introduction to the railway industry and collaborate across the business as you:

- Prepare and conduct reports, budgets and forecasts to the Danish company as well as to the controlling unit in Germany
- Conduct analyses and business cases for department managers across the Danish organisation and support financial decision-making throughout
- Help to identify new opportunities for optimising processes and reporting procedures

*"Our mission is to engage and motivate the business as Financial Business Partners. We act as financial advisors for our managers while at the same time allowing ourselves to challenge the organisation for improvements".* says Daniel Drejer, Head of Controlling.

### **We are looking for a financial talent with strong communication skills who:**

- has a financial educational background and previous experience as a consultant, business partner, business controller, business analyst or similar
- is business minded, and you know how to develop analyses to identify commercial improvement areas
- value collaboration and enjoy communicating with people across functions and borders, and you are not afraid to reach out to colleagues to get things done

- has solid communication skills in English, both in speech and writing
- preferably are already familiar with SAP BPC and Power BI.

**Where does your destination take you?**

*“We strive to keep improving and learning from our attempts to improve the financial outcome. Operating in a complex and dynamic environment provides plenty of opportunities to form our approach towards the organisation, while securing a continuous improvement of our skills and competencies”* Daniel states.

**Interested?**

For further information, please contact Daniel Drejer, Head of Controlling, on +45 20 74 58 53.

If this is the job for you, please send your CV and cover letter in English or Danish as well as relevant diplomas to [Daniel.Drejer@deutschebahn.com](mailto:Daniel.Drejer@deutschebahn.com)

Please apply as soon as possible as we will assess applications continuously. All enquiries and applications will of course be handled confidentially.
